

Using a Urinal

Sometimes bathrooms have urinals.

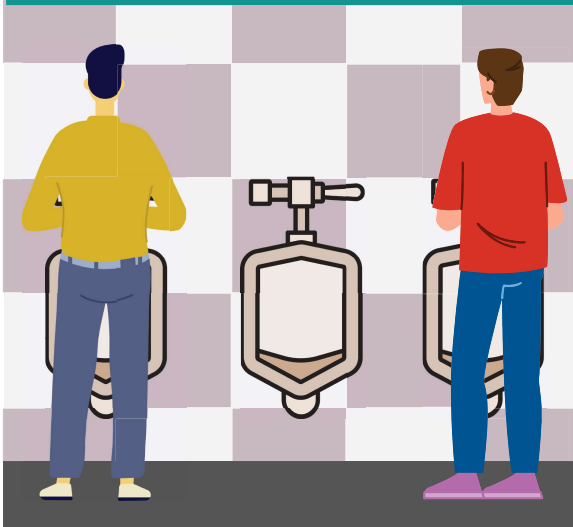

Urinals are only for peeing.

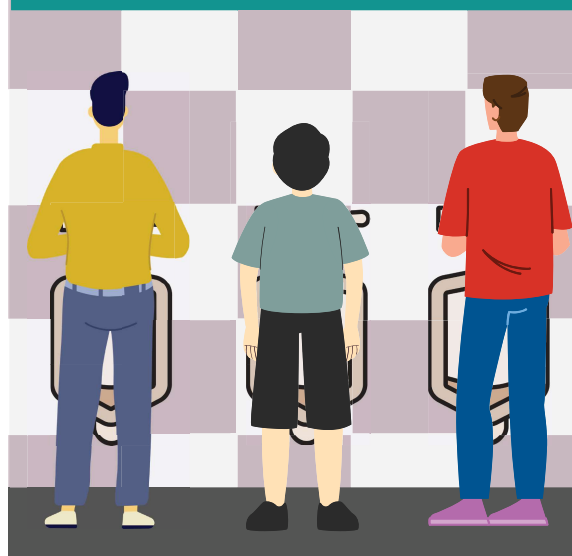

Other people want space when they are using a urinal.

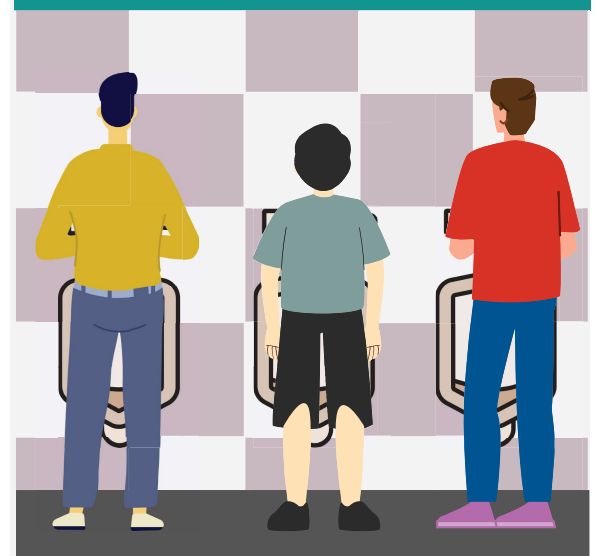

If there is more than one urinal, I should not use one that is next to someone else.

If there are no extra urinals, it is okay to use one next to someone else.

I should not talk to other people when I am using the urinal.

Using a Urinal

When I use a urinal, I should only pull the front of my pants down.

RIGHT WAY

WRONG WAY

I should not pull my pants the whole way down.

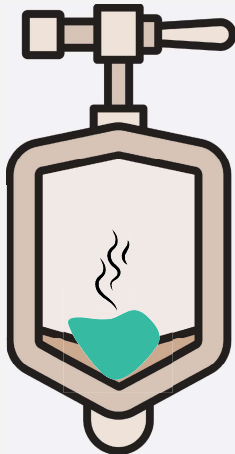

WRONG WAY

When I am done peeing, I should pull my pants up before I walk away from the urinal.

Sometimes urinals have things in them to make them smell better.

I should not touch anything in the urinal or in the bathroom.

I should wash my hands with soap and water before I leave the bathroom.
