

# Online Scams

Online shopping can be easy and fun, but I need to make sure that I'm careful when I buy things online.

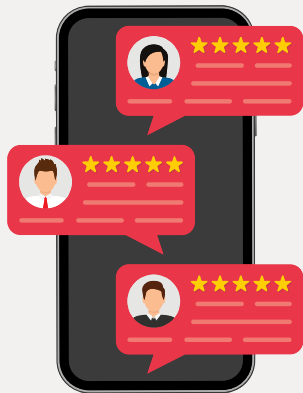

I need to make sure that I purchase things from good websites that are safe and trustworthy.

There are things I can do to make sure that I don't get scammed when buying things online.

I can make sure that the site and person I am buying from has a good reputation.

I can check for reviews of websites and businesses on Google, Yelp, or the Better Business Bureau website.

I can read customer reviews about the person or business selling the item.

# Online Scams

If I am buying something directly from a person and need to meet them to get the item, there are things I should do to help me stay safe.

I can make sure that I meet them in public and bring someone with me to pick up the item.

I will not give the person money until I have proof that the item is present and in good condition.
