

WEARING OXYGEN

I need to wear a tube in my nose to get oxygen to my body.

My body needs oxygen to work and stay healthy.

If I take my oxygen off, I can get very sick and have to go to the hospital.

If my oxygen tube is uncomfortable, I can ask staff for help but I need to leave it on.

It's important to wear my oxygen when I'm laying down or I may get very sick.

Wearing oxygen helps keep me healthy.
