

I had two doses of Pfizer or Moderna vaccine or one dose of Johnson and Johnson to protect me against COVID-19.

Now scientists recommend extra booster doses of vaccine to protect me even more.

Scientists will keep doing research and I might need another booster dose in the future.

Rules about wearing a mask are also changing.

Many places don't require a mask but if I feel more comfortable wearing one, I can.

If I am visiting someone in their home, I can ask them if they want me to wear a mask.

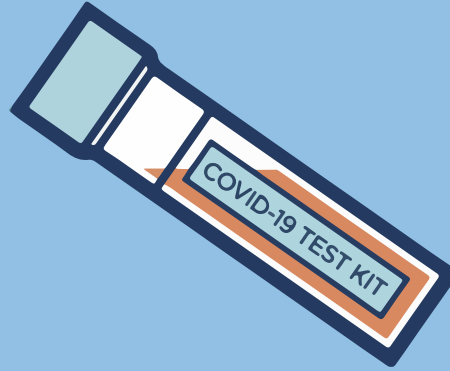

COVID BOOSTER SHOTS, MASKS & TESTING

I should also get tested for COVID-19 if I think I am getting sick.

I can use a home test to do it myself or I can go somewhere like a pharmacy or testing site that will test me.

If I have questions, I can talk to my doctor or look at the CDC (Centers for Disease Control) website.
