Gender: (All) Race & Ethnicity: (All)

Health status compared to 12 months ago

Caregivers Reporting for Individuals with ASD
Individuals with ASD Reporting for Themselves

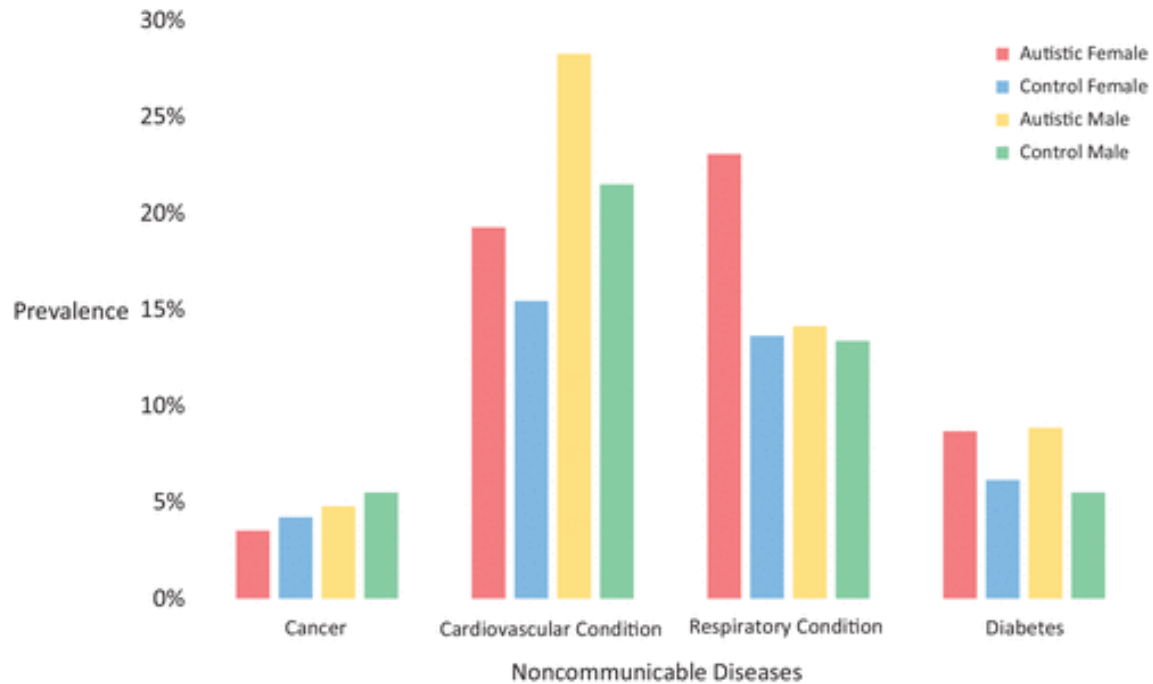

Data from Pennsylvania Autism Needs Assessment (2018) | ASERT Collaborative Eastern Region

Physical Health Conditions (continued)

Unadjusted prevalence of cancers, cardiovascular conditions, respiratory conditions, and diabetic conditions.

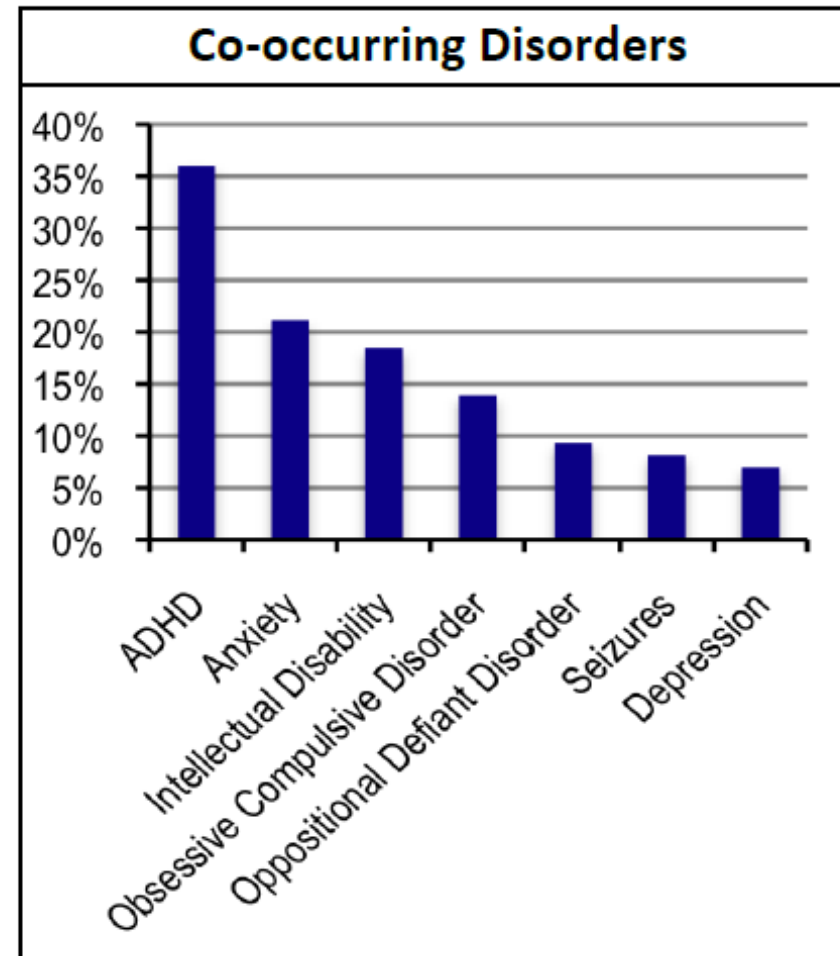

"Recent research has identified that autistic adults may be at higher risk of negative life experiences (Griffiths et al., 2019) and that, in children, these negative life experiences can affect their health (Rigles, 2017)." - Weir et al, 2020

Mental Health Needs

- 85% of individuals on the autism spectrum have a co-occurring diagnosis.

Thank you for attending!

Please look out in your email for an evaluation of the PA Gathering!
